

# Dear Colleagues!

Association for Engineering Education of Russia invites all universities to participate in the public-professional accreditation of engineering education programs. This public-professional accreditation in engineering and technology is a process to improve the quality of engineering education in accordance to the global standards, and to obtain acknowledgement in the professional engineering community for high-qualified professional engineering training.

Such accreditation of engineering education programs provides the opportunity to obtain an independent evaluation of the quality of the university's education programs and recommendations for their further improvement; to assert one's high-professional engineer training level and, thus, enhancing the competitiveness of engineer-graduates in the domestic and global labor market.

The graduates of such accredited engineering education programs can receive the profession degree EUR ING "European Engineer" in the future.

Association of Engineering Education is the only agency in Russia that has the qualifications to certify EUR-ACE. Accredited programs are included in the AEER accreditation program register, as well as, the European register of accredited engineering programs.

All necessary information can be found on the following website:

Accreditation Center AEER [www.ac-race.ru](http://www.ac-race.ru).
